Supporting Marketing Planning of Tourism Managers

Karl Wöber

karl.woeber@modul.ac.at

MODUL University Vienna
Department of Tourism and Hospitality Management

Tourism Networks in Europe

European Cities Marketing

www.europeancitiesmarketing.com

- 130+ City tourism organisations of Europe (>30 countries)
- Working groups:
 - Research and statistics
 - Information Technology
 - Communication and PR
 - City cards

European Travel Commission

www.etc-corporate.org

- 38 National tourism organisations of Europe
- Activities:
 - Public relations
 - Consumer advertising
 - Trade promotion
 - Market research

Typical Research Questions

- How important is tourism for my destination?
- What are the main trends in travel behaviour?
- What is my optimal market segmentation strategy?
- Who are my competitors?
- How effective are the marketing strategies & business models I could apply to my destination?
- ...

Limitations of Market Research

- Information does not exist
- Information is not up-to-date
- Data is not comparable
- Information is too specific and therefore of limited relevance for a particular problem
- Information is not detailed enough
- Interpretation is difficult and explanation is missing
- The cost-benefit-ratio of market research studies is generally perceived as low

Welcome to TourMIS!

TourMIS is a **Marketing-Information-System for tourism managers**. The major aim of TourMIS is to provide information and decision support for tourism managers and scholars. Therefore, TourMIS provides on-line tourism survey data, as well as various tools to transform data into precious management information.

Since 2000 this initiative has provided the tourism industry with predominantly **free** access to overall data and functions of TourMIS (registration is required). TourMIS is open to all authorized tourism organizations, societies, tourism consultants, companies, tourism training centres, pressure groups, etc. in Austria and abroad. By covering the maintenance costs, a **consortium** of the most important initiators of market research projects in Austria and Europe guarantee the continuous updating of the comprehensive database. The programme modules contained in the method-base are developed according to the specific requirements of tourism managers at the Institute for Tourism and Leisure Studies at the University of Economics and Business Administration in Vienna (contact: Dr. Karl Wöber). The development of TourMIS is financially supported by the **Austrian National Tourist Office** and the **European Travel Commission**.

TourMIS can be used by any Internet browser, however, for full functional support Microsoft Explorer is recommended.

Technical Components

TourMIS requires registration – but almost all data is accessible for free!

relational database. Inserting and web-based user interface. All pages in hardware is located at the Vienna University (1090 Vienna, Augasse 2-6, Austria, saved at a different location.

Austrian tourism statistics is the largest data source in TourMIS

Data since 1972, 17 accommodation categories, 72 markets, 18 destinations; In total: 3mn figures, approx.

60,000 new figures automatically added to the DB every month

- [Excel data upload form for ECT members](#)

Tourism in Austria >> Nights and arrivals

- ▶ [Monthly data](#)
- ▶ [Seasonal data](#)
- ▶ [Annual data](#)
- ▶ [Special](#)

The **arrival and overnight statistics** from Statistik Austria are based on surveys conducted in about 1600 municipalities and some 75,000 commercial and private accommodation enterprises. The municipalities communicate the development of their arrival/overnight monthly data to Statistik Austria. Arrival/overnight data was collected from 15 types of accommodations and approx. 40 source countries according to month, season (winter, summer) and calendar years.

TourMIS provides the data for all of Austria as well as for the provinces. In addition to tables and graphs, TourMIS also offers analyses and evaluations such as benchmarking comparisons and evaluations on the development per season that are often needed in tourism management. The results of the individual municipalities can be accessed in the database of Statistik Austria, ISIS, for a fee (see [Statistik Austria](#)).

The survey conducted on the **capacity of accommodation establishments** by Statistik Austria is done annually on the key date 31 May in the 1,600 municipalities. In addition to the number of establishments, the number of beds in particular are

City tourism in Europe >> Nights & arrivals

▶ Availability

▶ Monthly data

▶ Annual data

In its 1995 annual convention the European association of city tourism organisations, European Cities Tourism (before: Federation of European Cities Tourism Offices), decided the installation of a working group to regularly compile European city-tourism statistics. The working group **Statistics and Research** focuses on giving a comprehensive survey of the most popular city destinations and their development as well as - by comparing the information received - contributing to a critical discussion and harmonisation of research metho

International data for European cities (ECM) and Countries (ETC)

Currently the data on overnights, arr **most comprehensive and up-to-date** which guarantees broad utilisation ar European Cities Tourism database in World Tourism Organisation (WTO) or by the European Commission (EC).

The data in TourMIS are collected with the help of tourism managers and the staff of over 130 tourist offices all over Europe who enter them online into the database. If data are entered in time a special and individual *benchmarking report* is provided back to the manager, whereas delays are met with *reminder-mails*.

Data compilation within TourMIS depends solely on the participation of ambitioned and interested tourism managers - hence no guarantee can be given for the quality and quantity of the data. Employees of tourist offices, statistical offices or city administrations taking an interest in actively co-operating in this project are kindly asked to contact Dr. Karl Wöber.

Due to different **definitions and survey methodologies** in different cities (and

Conclusions

- TourMIS enables a dialogue among key players and support the harmonization of terms and definitions
- Opening secondary statistics to the public (in a for manager readable form) empowers the small and medium sized tourism industry
- TourMIS increases the usage of management science models by linking management and scientists' interests

Examples for Research Questions

- How to (automatically) generate forecasts of tourism demand and communicate these findings to the tourism managers?
- How can we benchmark destinations facing a dynamic environment with multiple inputs & outputs and heterogenous data?
- How to detect unforeseen relationships and trends in the database?

Thank you! Any questions?

Karl Wöber
