Statistics of Inbound tourism

Agency of the Republic of Kazakhstan on Statistics

Vienna, June 2009

Concept of the Inbound tourism used in Republic Kazakhstan:

- **Inbound tourism**— travel on any country persons, its not being inhabitants
The enterprises:
• Rendering tourist services, with a kind of activity on NACE a code 63.3 (on new edition NACE a code 79);
• Rendering services on accommodation with a kind of activity on NACE a code 55.1-55.2 (on new edition NACE a code 55);

Individual businessmen:
• Rendering tourist services, with a kind of activity on NACE a code 63.3 (on new edition NACE a code 79);
  – Rendering services on accommodation with a kind of activity on NACE a code 55.1-55.2 (on new edition NACE a code 55)

Methods of inspection:
- Continuous inspection of the enterprises and individual businessmen.
On results of 2008 2376 statistical units participated in inspection: on tourist services - 1163 enterprises and 64 individual businessmen; on services of accommodation - 528 enterprises and 621 individual businessman.

- Geographical scope - on republic, on areas.
- Periodicity of inspections - on a quarterly and annual basis.
Sources of the information at formation of statistics of Inbound tourism:

- Data of statistical inspections:
- Quarter and annual periodicity:
- 1-tourism, H-010 - for tourist firms;
- 2-tourism, H-030 - for objects of accommodation;
- Data of administrative sources:
- Data about quantity of the persons who have proceeded through check points of Boundary service CNS RK (without taking into account the persons who have arrived on a constant residence, arrived for work from Russia, Uzbekistan, Kyrgyzstan, Tajikistan)

The basic indices of statistics of Inbound tourism:

-Volume of the rendered services and number of the served tourists tourist firms and objects of accommodation
New directions of statistical activity:

- Carrying out of inspection of the self-organized tourism;
- Revision of statistical toolkit and methodological approaches in inspection of sphere of tourism according to new edition of qualifiers NACE, SPA, methodical recommendations of the United Nations and WTO 2008
