Tourism Statistics – Inbound/Outbound Tourism

Edite Miezite, Head of Transport and Tourism statistics
CENTRAL STATISTICAL BUREAU OF LATVIA
June, July 2009, Vienna

Inbound/Outbound Tourism – developments since Workshop II

• Once in a month is counted outgoing/incoming flow separating by residents and non-residents in Riga Airport to estimate a proportion in the flow of passengers of residents and non residents as this information is not given by airline companies;

• Counting of incoming and outgoing flows separating by residents and non-residents 2 times per year on Schengen roads (Grenctale (LT), Ainazi (EE));

• The results in 2008 from State Road agency were received from 2 roads (movements of transport vehicles) but in 2009 2 more places on roads were added.
Inbound/Outbound Tourism – planned developments since Workshop II

• In future even more places of movements on the roads are planned to include for analysis and comparisons to estimate a total flow of visitors;

• It is considered to interview near the previous border posts in nearest restaurants, rest places or petrol stations to somehow replace interviews that were previously conducted in border checkpoints.

Thank You for your attention!
