Mozambican Classifications of Economic Activities – CAE Rev. II

The Classification of Economic Activities is harmonized with the international classifications in this area such as CITARev. IV, NACE Rev. II and ISIC Rev. IV.

CAE Rev. II, was approved in 2008 and adopted to the BR in 2009.
To move from the CAE Rev. I to the CAE Rev. II, two actions took place:

• Direct approach between old and new CAE, using correspondence tables for automatic updating; and

• Updating survey to re-codify the units that were not into the automatic process.

Future Plans

Installation of a search engine in the server (being tested).

The main goal of this engine is to allow users to consult if their enterprises are recorded. In case of not, the system allow the user to register using a specific account raised for this purpose.
