Tourism Satellite Accounts in Austria (incl. TSA in EU Member States)

www.statistik.at

We provide information

Outline

- Tourism Satellite Accounts (TSA) in general
 - What, why & how
 - Use of TSA
 - Concepts and methods
- Tourism Satellite Accounts (TSA) in Austria
 - State of the art
 - Data sources
 - Results
- Tourism Satellite Accounts (TSA) in EU-member states

www.statistik.at

slide 2 | 7-9 November 2012

Tourism Satellite Accounts (TSA) in general

www.statistik.at

slide 3 | 7-9 November 2012

What is (Tourism) Satellite Accounting?

- **Extension** to the “System of National Accounts” (SNA) which enables a better understanding of the size and role of an activity which is usually “hidden” within such accounts.
- Satellite accounts **provide**
 - **additional information** on particular social concerns of a **functional** or cross-sector (multidisciplinary) nature (e.g. environment, agriculture, tourism);
 - the possibility of using of **complementary or alternative concepts**, including the use of classifications (when needed) and accounting frameworks (e.g. TSA);
 - **further analysis** of specific data by means of relevant indicators and aggregates;
 - **linkage** of **physical** data sources (e.g. flows, employment) and analysis to the **monetary** accounting system.

Overall Economy

Arts, entertainment and recreation (R)

Accommodation and food service activities (I)

Transportation and storage (H)

Real estate, activities (L)

Financial and insurance activities (K)

Information and communication (J)

Agriculture, forestry and fishing (A)

Mining and quarrying (B)
Manufacturing (C)
Electricity, gas, steam and air conditioning supply (D)

Water supply; sewerage, waste management and remediation activities (E)

Construction (F)

Wholesale and retail trade; repair of motor vehicles and Motorcycles (G)

Tourism industries

Tourism and other industries

www.statistik.at

slide 5 | 7-9 November 2012

Why doing TSA?

Tourism, what for?

Value added effects &

Employment

Policy

Statistics

Improving the “visibility” of the „economic value” of the tourism industry

More reliable and coherent tourism and travel statistics system
“Integrated System”

www.statistik.at

slide 6 | 7-9 November 2012

How is TSA done?

Integration of Supply and Use

Supply

„Tourism Industries“?

(Non-visitors take lunch in a restaurant, visitors are buying non-tourism characteristic goods and services, e.g. clothes)

„Tourism and non-tourism consumption“

Share of tourism consumption related to total consumption (tourism and non-tourism)

T
O
U
R
I
S
M

S
H
A
R
E
S

Use

„Tourism consumption“?

(Visitors, non-usual environment, main motivation of the trip, expenditure)

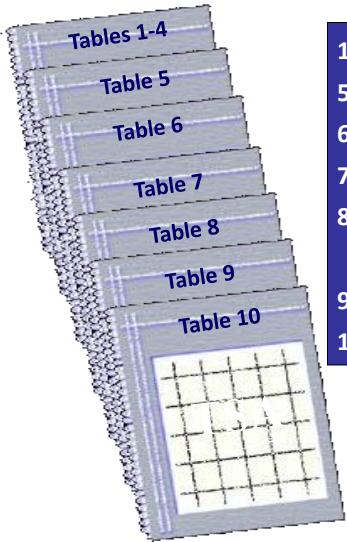

„Tourism consumption“

Every good and service receives a tourism share, which is applied to the corresponding industry (Gross Value Added; GVA)

“Tourism Value Added” (TVA) per industry, sum results in total TVA which is applied to total GDP

Share of total TVA related to GDP (in %)

The 10 TSA Tables

- 1- 4 Tourism expenditure/ consumption
- 5 Production
- 6 Demand meets Supply
- 7 Employment in tourism industries
- 8 Tourism Gross Fixed Capital Formation
- 9 Tourism Collective Consumption
- 10 Non-monetary indicators

Use of TSA

- Describing the size and the **economic importance** of tourism;
- Providing detailed information on **visitor consumption, including all forms of tourism**;
- **Linking** economic data and other non-monetary information on tourism;
- Providing a reliable and credible **tool** necessary for both effective **public policies** and efficient **business operations** ;
- **Enhance robust information** and indicators on the role tourism is playing and can play in the economy;
- Bring **new recognition and confidence in tourism** as one of the most important sectors of the economy;

www.statistik.at

slide 9 | 7-9 November 2012

Use of TSA (cont.)

- Including **all kind of tourism activities**, same-day visits, overnight visits, visits in rented and non-rented accommodation;
- Give **greater credibility to tourism statistics** and to the indicators analyzing the scale and the significance of tourism as an economic activity;
- Provide a rich and **informed vision** of the “tourism industry” and of its component activities;
- Generate usable, practical **information for companies** and in particular for SMEs;
- Development of **research and innovative methodological approaches**;
- **Allow international comparison** of results by considering all kind of tourism activities;

www.statistik.at

slide 10 | 7-9 November 2012

Use of TSA (cont.)

- **Reconciliation/benchmarking** tool regarding demand and supply related data, considering the quality of the data used;
- **Using/combining different data sources** as a prerequisite for receiving a consistent TSA;
- Starting point of the documentation of the **meta data** related the data used compiling TSA;
- Starting point of **cooperation** between NSI and NTA, Central Bank, research institutes, and exchange of views with the tourism industry;
- Starting point of general considerations related the tourism statistical system, including the introduction of **best estimates, modeling and extrapolation methods**;
- Starting of discussion related the **quality of the used statistics** and rethinking of the used concepts;
- Increasing the **public acceptance** of tourism statistical data and justifying new/additional research in this field.

slide 12 | 7-9 November 2012

TSA in Austria – integrated part of Tourism & Travel Statistics

www.statistik.at

slide 13 | 7-9 November 2012

TSA in Austria - Factsheet

What is calculated

Aim	(Monetary) information about tourism as an economic phenomenon; by integrating the supply and demand side
Subject	Tourism's contribution to national and regional value added of Austria and "Lower Austria", "Upper Austria" and "Vienna"
Coverage	Visitor consumption (domestic , inbound, domestic part of outbound trips), direct and indirect tourism and leisure effects

Why is it calculated

Legal basis	x
Contract	National TSA: Federal Ministry for Economy, Family and Youth (BMWFJ) Regional TSA: Tourism Boards of Lower Austria, Upper Austria, Vienna

How is it calculated

Type of statistics	Accounts (synthetic product: model estimation based on existing data)
Method	National TSA: Recommended Methodological Framework (UNWTO, OECD, EUROSTAT, 2008); Regional TSA: Recommendations are not available (but country experiences and best practices)

www.statistik.at

slide 14 | 7-9 November 2012

TSA for Austria – state of the art

Tourism Satellite Accounting in Austria is

- **commissioned** by the “Federal Ministry of Economy, Family and Youth”,
- done in **cooperation** with the Austrian Institute of Economic Research (WIFO),
- done by the **Tourism Statistics’ section** of Statistics Austria,
- done **every year**,
- not a perfect system, but **being yearly improved**,
- a **living system**, taking into account any relevant data source,
- **methodologically** based on the UNWTO/EUROSTAT/OECD TSA requirements,
- **not as detailed** as required according to the UN-Manual,
- the **basis** for Regional TSA and the Employment Item.

www.statistik.at

slide 15 | 7-9 November 2012

TSA for Austria - simplified but not simple

Tourism Satellite Accounting in Austria is

- **available** for TSA-Standard-Tables 1, 2, 4, 5, 6, and 7;
- not based on primary data sources, but mainly on **secondary data sources**;
- partly and where necessary or feasible based on **estimates** and **assumptions**;
- only published for **current prices**, not constant prices;
- published taking into account **key results**, only;
- extended by considering **indirect effects**;
- extended by taking into account **leisure effects**.

Extended TSA – the main results 2011

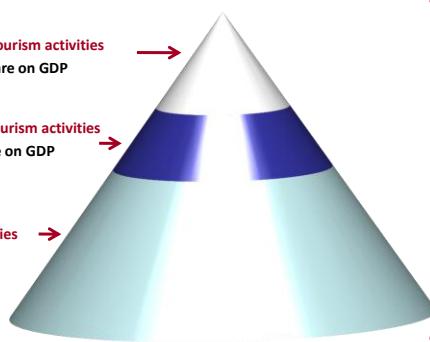

Economic effects of tourism and leisure activities

Direct VA according to **Tourism activities**
15.6 bn €, 5.2% share on GDP

Indirect VA according to **Tourism activities**
6.7 bn €, 2.2% share on GDP

Direct and indirect VA
according to **Leisure activities**
21.8 bn €, 7.2% share
on GDP

* Excl. business trips; 2011: forecast.

Economy:
2011: Total VA 44.1 bn €,
14.6% share on GDP*

Employment:
About one fifth
of the Austrian FTE

Tourism Satellite Accounts (TSA) in EU Member States

www.statistik.at

slide 22 | 7-9 November 2012

TSA in EU-countries: 2008-2009 Eurostat project

- The **general objective** of the Eurostat TSA-project 2008-2009 was to assess the implementation of TSA in the Member States. - The project focused
 - on the methodologies applied;
 - on the comprehensiveness of the results achieved;
 - on fostering the exchange of experience;
 - on offering technical assistance to those countries being less advanced in this exercise.
- **Achievements and conclusions of the project:**
 - Most Member States have now started the implementation of TSA
 - Clear information on the situation in each of the Member States
 - Better convergence of the work done
 - Assessment of the comparability of the results
- **For more information:**
 - Eurostat:
<http://epp.eurostat.ec.europa.eu/portal/page/portal/tourism/methodology>

TSA in EU-countries: Current work

- Regulation (EU) No 692/2011 of the European Parliament and of the Council of 6 July 2011 concerning European statistics on tourism and repealing Council Directive 95/57/EC
<http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=OJ:L:2011:192:0017:0032:EN:PDF>
 - Article 5 (Pilot studies): The Commission shall draw up a programme for pilot studies which may be carried out by Member States on a voluntary basis in order to prepare the development, production and dissemination of harmonised tables for tourism satellite accounts and to assess the benefits in relation to the cost of the compilation.
- Voluntary transmission of TSA data since 2010 by EU and EFTA member states to Eurostat
- The European Commission promotes the use of TSAs by the EU Member States in order to improve the understanding of European tourism.
