OLD TBILISI WALKING TOUR

Old Tbilisi - One of the Must-Dos and probably the most distinctive pleasures of visiting Tbilisi is wandering through the Old City, with its old-style balconies, ancient churches, winding, narrow streets, and charming shops. Here one will notice a number of eclectic sights – sites ranging from churches to mosques and synagogues, as well as the art galleries lining along the way. The uniqueness of attractions, the cultural and architectural diversity widely presented at this spot starting from Sulfur Baths, Betlemi - housing two of the city's oldest churches and the stunning views from the Narikala Fortress is simply overwhelming.

The tour includes:

Metechi Church – built in 1278-1284 years represented as an unusual example of domed Georgian Orthodox Church;

A Cable Car Ride - connects Rike Park on the left bank of the Mtkvari River with Narikala Fortress. You can gaze at the fantastic 360° views of the city from the large windows of the car as well as have an easy ride to the top of the hill.

Narikala Fortress - one of the most famous, oldest and most favoured historic sites of Tbilisi (4th century).

The bath district, called “Abanotubani” catches one’s eye immediately with its small, brick domes on ground level. The sulfur waters are naturally warm and in a way represent the icon of the city since the well-known legend of how Tbilisi was founded is associated with the warm springs of the sulfur waters.

Gabriadze Theatre - founded by and named after Georgian artist as well as screenwriter, stage director, painter, sculptor and puppeteer, Revaz (Rezo) Gabriadze. The theatre as well as a magnificent tower with a clock and a golden-winged angel, built by the artist himself is designed as a unique architectural object that creates a magic effect of a fairy tale and complements the scenery of old Tbilisi streets.
